6 Best Meme Coins to Buy in 2024

Choosing the top meme coins to add to a portfolio can be difficult for investors, as there are hundreds of new coins vying for investors' attention in the [cryptocurrency](#) market.

Before making an investment, investors must exercise extra caution to educate themselves and conduct independent research on [cryptocurrency](#) meme initiatives. The popular and promising meme coins that we believe will do well in 2024 are listed below, along with their current market valuation and our analysis of them.

1. Dogecoin— The Most Famous Meme Coin That Is Widely Used

The first meme coin was Dogecoin. It was made in 2013 and features a Shiba Inu female dog named Kabosu. The coin's creators claim they made it as a prank to mock the fervour around cryptocurrencies in the early days.

Strange as it may seem, Dogecoin eventually became one of the most popular digital currencies in history. While Dogecoin's price remained relatively flat in its early years, the Reddit army helped propel the token to meteoric rise in popularity by 2020's close.

The value of Dogecoin skyrocketed in 2021 as the entire cryptocurrency market did. On May 8, 2021, the digital token reached a new peak of \$0.73.

Traders who were wondering if Dogecoin was still a good investment in 2024 would have reason to be optimistic since the token is currently seeing a resurgence after suffering losses since then. By May of that year, its market cap will have reached \$20.2 billion.

There are many other meme tokens out there, including a few on this list, all inspired by Dogecoin, the most famous meme coin of all time. A large number of internet retailers all around the globe employ it.

Coin Name	Dogecoin
Dogecoin Symbol	DOGE
Dogecoin Price	\$0.151
Dogecoin Price Change 24h	▲ 2.84%
Dogecoin Price Change 7d	▲ 13.85%
Dogecoin Market Cap	\$21,789,495,094

Circulating Supply

144,230,536,384 DOGE

2. Shiba Inu –The ‘Doge Killer’ of meme coins

Numerous meme coins have followed Dogecoin’s lead and done well in the cryptocurrency market. Shiba Inu, a digital token that was launched in 2020 and succeeded in imitating Dogecoin’s success, is in the vanguard of this. Because it is based on the Ethereum network, the digital token is compatible with smart contracts.

Would you recommend Shiba Inus as a pet? The answer is an emphatic “yes” from the many investors who see Shiba Inu as a better investment option than Dogecoin, its main rival.

In addition to being accessible on a plethora of exchanges and social trading platforms, Shiba Inu is compatible with a strong network of DeFi services, making it easy to incorporate into other crypto ecosystems.

The digital token's price was \$0.0000000051 upon its debut. The value of the token skyrocketed in October 2021, hitting a new all-time high of \$0.00008, a rise of more than fifteen million percent.

Can I still get a Shiba Inu? At least it's still selling for pennies. Shiba Inu tokens are valued at \$0.0000235 and have a market worth of \$14.2 billion.

Coin Name	Shiba Inu
Shiba Inu Symbol	SHIB
Shiba Inu Price	\$0.0000235
Shiba Inu Price Change 24h	▲ 3.96%
Shiba Inu Price Change 7d	▲ 2.73%
Shiba Inu Market Cap	\$13,873,813,198
Circulating Supply	589,289,410,812,691 SHIB

When Shiba Inu was released, the digital token was priced at \$0.

3. Pepe — Best Meme Coin With Distinctive Cultural Allure

Since its inception in April 2023, the meme token Pepe token (\$PEPE), which uses the renowned Pepe the Frog, has caused quite a stir in the cryptocurrency market.

Pepe Coin, which is built on the Ethereum blockchain, had a market cap of over \$1 billion in less than three weeks, surpassing the growth rates of other meme coins such as Dogecoin. At the moment, \$3.4 billion is its market cap.

Despite the extreme volatility, the coin's market resiliency is supported by its robust holding base. Pepe Coin's initial design goal was to restrict supply and improve value over time through a deflationary mechanism that involved burning tokens with each transaction. Nevertheless, given the recent changes to the project, the future of this functionality is unclear.

The usual dangers of investing in meme coins like Pepe Coin have recently been much more apparent due to events like the unexpected transfer of 16 trillion tokens, which led to steep price reductions and widespread community anxiety.

The token's rebound following the burning of 6.9 trillion tokens and the appointment of new advisers indicates that project development is ongoing and that management is making attempts to stabilize and guide the coin towards growth, despite these hurdles.

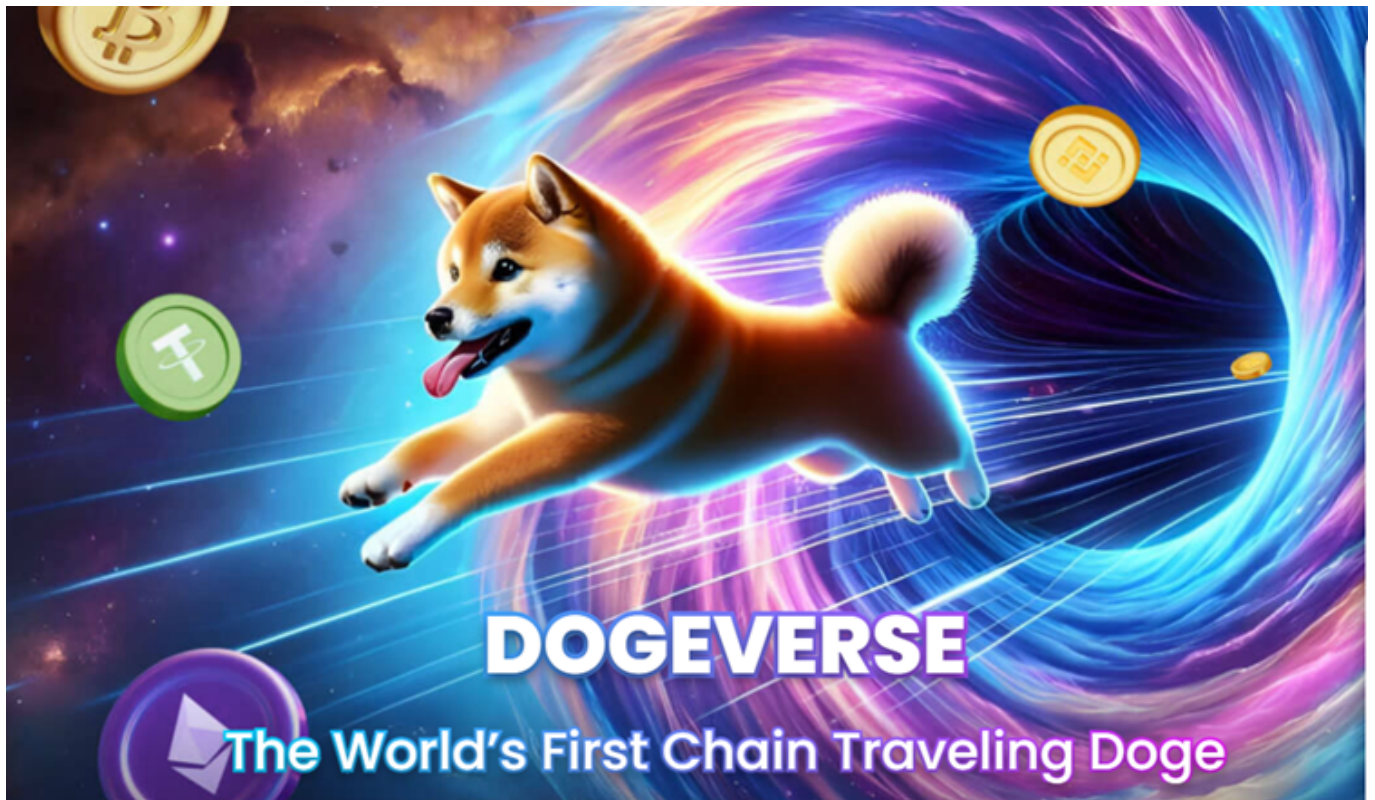

Crucial to Pepe Coin's success has been its interaction with its user base and the larger social media scene. Its value has gone up and down in response to prominent endorsements and social media debates.

Pepe Coin can be bought by investors through decentralized exchanges such as Uniswap, where they can exchange Ethereum for \$PEPE.

4. Dogeverse: The Best Meme Coin to Purchase Overall in 2024

Among the six main blockchains that Dogeverse (DOGEVERSE) is compatible with are Ethereum, Binance Smart Chain, Polygon, Solana, Avalanche, and Base. The coin features a unique dog theme. Thanks to its compatibility with many blockchains, this new meme coin is now accessible to a wider audience of traders and communities.

The staking APY is a key component. If you want to buy Dogeverse tokens during the presale, you should stake as soon as possible because the APY is going down. Since the ICO debut, approximately \$15 million has been raised, a sign that early investors have already taken advantage of this.

As stated in the Dogeverse whitepaper, the presale will only offer 15% of the total token supply, which is 200 billion. This implies that there will be a limited supply of tokens accessible during the presale, providing a tremendous opportunity for investors to potentially profit greatly during the bull run.

DOGEVERSE HAS A TOTAL SUPPLY OF 200,000,000,000 TOKENS

The \$DOGEVERSE token is minted on Ethereum and is unique in that it can also be claimed, stored and traded on Solana, BNB Chain, Base, Polygon, or Avalanche using Wormhole and Portal Bridge tech.

5. WienerAI —A New Meme Token with a Dog Theme and an AI Crypto Trading Bot

It appears that 2024 will be a banner year for the revolutionary WienerAI (\$WAI) meme token. In a bid to be the industry leader, WienerAI is offering massive staking rewards to early token buyers

during the presale.

Despite its AI moniker, WienerAI is just a joke currency that has no real value. Rather, the project's developers want to replicate the success of other dog-themed tokens like \$Doge, \$Dogwifhat, and \$Bonk by generating a huge online frenzy around the native token \$WAI. Beyond that, holders of \$WAI tokens can start staking their tokens for passive rewards right away, putting their investment to work.

There is no fuss while purchasing the token. Going to the official presale website and linking your preferred wallet is all that's required. Spend BNB, ETH, MATIC, or USDT to purchase \$WAI.

An early investment in WienerAI might turn out to be incredibly profitable, given the ongoing trend for meme coins inspired by dogs. Only 27.6 billion tokens, or 40% of the total supply, will be available during the presale.

Visit the WienerAI website for further details. Be sure to join the private Telegram group and follow WienerAI on X for all the newest project news.

6. Sealana—A Crypto Based on Solana That Could Become Viral

Next on our list of the best meme coins is Sealana's native token, \$SEAL. Sealana is a blockchain-based platform that tells the tale of a sluggish and overweight American Redneck seal.

Sealana joins the cryptocurrency token trading scene in an effort to escape his mom's basement. The well-known South Park character World of Warcraft Guy served as inspiration for this figure. After the success of meme tokens based on Solana, many investors would be interested in buying \$SEAL.

Popcat has increased by 260% and Solana by 80% in the last two weeks. As a result, new projects based on SOL are in high demand. Low petrol fee transactions at high speeds are also supported by Solana.

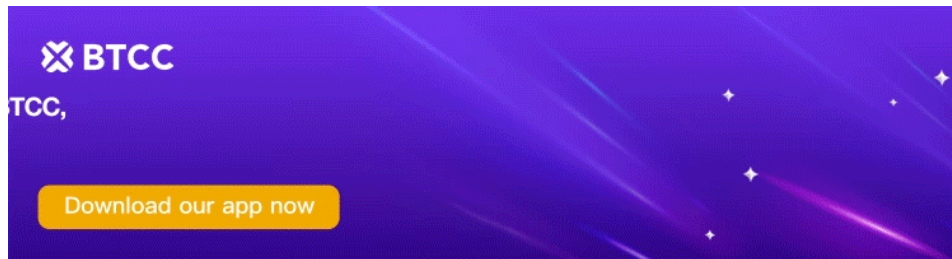

Those who are interested in participating in the presale can do so by sending SOL tokens to the following address:

A 15-minute video titled "DJ15ZYXqUNMYJ3hL7z4ciSaSFAw5cbos3YjGpdvwmF6c" could be played. Or you can buy tokens straight from the presale website.

At the moment, 6,900 \$SEAL tokens may be obtained with 1 SOL. Join the Sealana Telegram channel and follow Sealana on X (formerly Twitter) to stay updated on project progress.

What Is a Meme Coin?

Meme coins are a kind of digital currency that gains traction when linked to a particular fad in the internet community. In its early stages, meme coins were created with the intention of being humorous, drawing inspiration from internet culture and ideas.

In most cases, meme coins have no practical purpose. On the contrary, meme coins' value is frequently affected by online conversations, celebrity endorsements, and social media.

The first digital token to refer to itself as a "meme coin" was Dogecoin, as mentioned before. In the wake of its triumph, the cryptocurrency market saw a deluge of meme coins. You can find some of these on the top peer-to-peer cryptocurrency exchanges; for example, Shiba Inu and Bonk are popular among crypto investors.

A large number of meme coins, however, have caused investors to lose their capital. Because of this, investing in meme coins carries a high degree of risk, as it is impossible to foresee the market's movement, even in the short term.

[Deposit and Receive Up to 10,055 USDT](#)

What Affects the Meme Coin Price?

Cryptocurrency prices are subject to the same laws of supply and demand as those of any other investment. The elements that impact the overall market attitude for meme coins, on the other hand,

are rather different.

For example, speculation generally determines the market performance of meme currencies since they lack any practical use. Investors looking for the next meme currency should research the token's community and connected influencers.

Positive signs include, needless to say, well-known influencers and a robust community. A meme currency may become popular overnight if it becomes the subject of enough debate on internet forums.

As a result, the community expands, curiosity is aroused, demand increases, and the coin's price can potentially rise. Similarly, a meme coin's performance can be influenced by as little as a tweet.

Conclusion: Best Meme Coins by Market Capitalization

Even though Dogecoin has the largest market size, we think Dogeverse would be the greatest meme coin to invest in in 2024. With over \$2.7 million raised in just four days, it is now sitting at over \$13 million. This shows that investors are very confident.

It has great development potential and rich rewards thanks to its extensive multichain presence

across key blockchains and a tempting staking annual percentage yield (APY).

About BTCC

BTCC is one of the world's oldest and most popular bitcoin exchanges. Bobby Lee created it in 2011, with its headquarters initially located in Shanghai, China. BTCC contributed significantly to the early development of the Bitcoin and cryptocurrency ecosystems.

BTCC initially concentrated on Bitcoin trading, but it gradually expanded its capabilities to cover other cryptocurrencies as well. The exchange allows users to purchase, sell, and trade numerous cryptocurrencies, including as Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), and Bitcoin Cash (BCH), among others.

BTCC has received recognition for its strong trading platform, liquidity, and security precautions. The exchange provides features such as spot trading, margin trading, and futures trading to accommodate various types of traders and investors. It gives consumers real-time access to market data, order books, and trading charts, allowing them to make informed trading decisions.

BTCC has undergone various alterations throughout the years in order to adapt to the changing regulatory landscape. It expanded its activities abroad, opening offices in other countries to serve a global customer base. However, cryptocurrency legislation and availability may differ based on jurisdiction.

As the cryptocurrency market evolves, BTCC remains a significant player in the industry, providing a variety of services and contributing to the growth and development of the crypto ecosystem.

BTCC Pros

- **Established Reputation:** BTCC is one of the oldest and most well-known cryptocurrency exchanges, having been operational since 2011. Its history in the market enhances its credibility and trustworthiness.
- **A Diverse Selection of Cryptocurrencies:** BTCC allows customers to access and exchange a wide range of digital assets.
- **Margin and Futures Trading:** BTCC provides margin and futures trading options, allowing customers to expand their trading holdings and potentially increase their profits.
- **Proficient Trading Instruments:** such as real-time market data, trading charts, and technical analysis indicators. These tools can help users make informed trading decisions.
- **Security Measures:** BTCC values security and uses a variety of safeguards to secure customer payments and information. This includes two-factor authentication (2FA) and cold storage of cryptocurrency assets.
