FX Guys (\$FXG) Presale

FX Guys launched presale for its native token, \$FXG. According to its tokenomics, 35% of total supply are allocated for presale buyers.

FX Guys's presale includes multiple stages. As each presale round concludes, token prices are set to increase incrementally, providing significant early investment potential. This means the earlier an investor decides to buy, the better the price comes.

Notably, \$FXG is at a steep discount right now. That's because it's currently in Stage 2 of its public presale.

As of writing this article, FXG token is available for just a discounted price of \$0.04 per token, but after this presale round, the price will increase to \$0.05 when it moves to the next presale stage.

At present, \$FXG presale has smashed a total of \$3,200,504, indicating a strong appeal and huge demand among investors.

Once the \$FXG presale concludes, it will launch at a price \$0.10. So, Stage 2 \$FXG investors will make 150% returns at launch.
