### How to Mine Pi Coin? The Beginner's Guide

The Pi [cryptocurrency](#) is a brand-new, cutting-edge coin that is currently in development. But given that it has already drawn a sizable user base, [Pi](#) has a chance to become into a significant participant in the bitcoin space.

The method used to mine the [Pi](#) cryptocurrency is among its most distinctive features. In contrast to other cryptocurrencies, Pi coins are not mined using sophisticated computers. Rather, cellphones are used for Pi coin mining. Because of this, everyone can participate in Pi mining, irrespective of their level of financial resources or technological proficiency.

We'll give a thorough introduction to Pi cryptocurrency mining in this post. We will talk about the various ways to mine Pi coins, their security, the future of Pi cryptocurrency mining, and how to mine Pi coins.

## How to mine Pi coin using a phone

- To begin mining Pi, just do these few steps:
- Look for the Pi Network app on Google Play or the App Store to get it for your phone.
- Install the app on your mobile device after downloading it. It's cost-free.
- Select if you wish to register with your phone number or your Facebook account. Please be aware that you can lose access to your Pi coins if you select the first option and afterwards lose access to your Facebook account.
- Put in your phone number, country of residence, nickname, last name, and first name.
- Put the invitation code in here. It is available from an existing Pi Network user. To find out more, conduct a Google search.
- Initiate Pi mining by pressing the lightning button. It will take a whole day for the mining procedure to finish before you have to hit this button once more.

## Pi Crypto Mining Methods

Mining Pi coins can be done in a variety of ways. Using the Pi Network programme to mine Pi coins is the most prevalent technique. Nonetheless, there are a plethora of alternative ways to mine Pi coins, including:

**Making a Pi mining rig:** A Raspberry Pi and a few other parts can be used to construct a Pi mining rig. Although mining Pi coins with this method is more complicated, it may also be more rewarding.

**Using a cloud mining service:** You can mine Pi coins without needing to buy your own hardware

by using a variety of cloud mining services. While it can be more expensive, this is a practical way to mine Pi money.

## Difference between Pi mining and Bitcoin mining

Mining a Pi Network coin differs greatly from mining Bitcoin in several important ways.

	<b>Bitcoin</b>	<b>Pi Network</b>
Costs of mining equipment	High - requires specialised hardware (ASIC)	Can be mined on a mobile phone
Electricity costs	High	Insignificant
Complexity of setting up the equipment	Medium	Very low
Profitability	Profitable in regions with cheap electricity	Unknown
Market cap (as of 06/10/22)	\$384,786 B	\$0
Privacy	Above average	Low

## Is it profitable to mine the Pi Network?

At this time, there is no market for or exchange for the Pi coin, and its value is zero. Just with Bitcoin's pricing in 2008, the developers themselves stress that Pi's price is currently zero. Since Bitcoin did not exist in 2008 when the first block was generated, this is, of course, correct.

Because of this, determining the profitability of Pi mining at present time is not feasible. On the other hand, the Pi Network mining tool doesn't cost anything and uses almost minimal power when running. Miners will still make money off of the coin after it's posted on cryptocurrency exchanges, regardless of its price.

It's important to remember that the app requires personal information such as a name, phone number, country of residence, and, if you want to register with a Facebook account, the ID of that account. Therefore, the possibility of this data being stolen is always there. This makes the developers' willingness to incorporate KYC procedures—that is, complete client identification using personal data like passports and addresses—all the more dubious.

Until the Pi Network's mainnet is up, it's hard to say whether the Pi token has any future. According to the project's official website, there are currently no scheduled launch dates. Even if there is no fee to users for mining on Pi, there are some warning flags, including as the app's closed-source nature, the use of pyramid schemes, and the requirement to pass Know Your Customer (KYC) tests.
