How To Trade Stellar (XLM) Futures On BTCC

Without having to purchase and retain any [Stellar](#) stock in your portfolio, you can have exposure to the company through Stellar (XLM) futures.

[Stellar](#) futures are an agreement between two counterparties to buy and sell a particular amount of XLM at a certain future Stellar price on a specific day and time. They allow you to get exposed to Stellar without having to own it. Individuals and organisations that hold Stellar can utilise futures to hedge their exposure to market movements.

BTCC offers daily, weekly futures and perpetual contracts for Bitcoin derivative trading. The weekly Bitcoin futures contracts can be held up to a maximum of one week starting from Sunday 09:00 - Sunday 05:00 (UTC+8). However, the Bitcoin perpetual contracts has no expiry period, and you can maintain your position as long as you meet the margin requirements.

What are Stellar (XLM) Futures

A Stellar futures contract is an agreement to buy or sell a certain amount of Stellar (XLM) at a predetermined price at a future date.

Stellar futures markets offers two crucial aspects to cryptocurrency investors:

- Buying XLM futures permits traders to leverage their holdings of Stellar coins (10x to 50x not uncommon)
- By selling XLM futures, traders can profit from a decline in the XLM price.

Due to the fact that Stellar futures contracts traded on the majority of cryptocurrency exchanges today have no expiration dates, they are also known as Stellar perpetual futures or Stellar perpetual swaps.

How to Trade Stellar (XLM) Futures on BTCC?

Now you can trade XLM on [BTCC](#). BTCC supports a diverse selection of cryptocurrencies for trading. This includes popular cryptocurrencies such as Bitcoin (BTC), Ethereum (ETH), Litecoin (LTC), Bitcoin Cash (BCH), and others. BTCC also offers products such as crypto, gold, and tokenized stocks to help investors rationally allocate their assets.

STEP 1: Register an Account

Visit the BTCC website and create an account. Provide the requested information, complete the verification procedure, and implement any necessary security measures, such as two-factor authentication (2FA).

1. 1 Open an Account

Creating a new account is the initial stage in beginning to trade on BTCC. To prevent falling victim to phishing attacks, ensure that you visit the official BTCC website and select the “Register” icon located at the top of the page.

This will redirect you to the registration page, where you will be required to submit some basic

information, including your email address or phone number and a password. Enter the Referral code below to receive rewards if you have been referred by another BTCC user.

Next, you will receive a confirmation email to validate your identity. Execute the procedure by adhering to the instructions provided in the email. This procedure guarantees that your new BTCC account is exclusively accessible to you.

2.2 Verify Your Identity

In order to comply with KYC/AML regulations, licensed crypto exchanges such as BTCC are required to identify all registered users. To accomplish this, you will require a government-issued identification document, such as a national ID, passport, or driving license.

Not only will your account be verified, but your daily transaction limit will be increased, and you will be eligible for a variety of special offers (coupons/rebates) by uploading a photo of your document(s).

2.3 Secure Your Account

It is imperative to safeguard your account and prevent unauthorized transactions or access once it has been verified. You can simply activate two-factor authentication (2FA) in your account settings, which adds an additional layer of security.

Furthermore, it is crucial to employ a password that is both unique and complex, and it may be beneficial to employ a password manager. It is imperative to safeguard your investments by ensuring the security of your account.

The screenshot displays the BTCC account settings interface. A modal window titled "Mobile Phone Verification" is open, featuring a close button (X) in the top right corner. The modal contains the following elements:

- A dropdown menu for the country code, currently set to "+33" with a French flag icon.
- A text input field labeled "Please enter your mobile number".
- An "SMS verification code" section with a "Get code" button.
- An "Email verification code" section with a "Get code" button.
- A large blue "Confirm" button at the bottom.

The background settings page is dimmed and shows the following options:

- Your Password**: A strong password helps keep your personal info and assets safe.
- Mobile Phone**
- Email Address**
- Google Authenticator**
- Fund Password**
- Withdrawal Address Whitelist**: Once this function is enabled, your account will only be able to withdraw to your frequently used addresses.

Notes on depositing crypto

1.This is the USDT-TRC20 address. Please do not deposit cryptocurrency other than USDT-TRC20, otherwise, you may lose your assets.

2.The minimum top-up amount is 2USDT-TRC20. Any top-up amount smaller than this will not be credited and will not be refunded.

3.The transaction will have to be confirmed by the blockchain network nodes after the deposit is made to the address. Therefore, the deposit of [USDT-TRC20] may be affected by network congestion at times. Your patience is greatly appreciated.

2.3 Convert

BTCC offers futures trading, which enables users to leverage up to 225x on over 300 USDT-margined and coin-margined perpetual contracts. Traders may generate profits by maintaining either long or short positions.

If the user does not possess USDT, it will suggest that they exchange USDT at BTCC. This tool enables users to instantaneously convert over 200 distinct types of cryptocurrencies into USDT, enabling them to trade USDT-margined futures on the platform.

The BTCC Conversion Function is a beneficial addition to the toolkit of a merchant. This enables BTCC consumers to convert the crypto they possess into USDT in a matter of seconds. This eliminates the necessity for users to undergo the time-consuming process of transferring cryptocurrency from their wallet and subsequently converting it to USDT.
