Melania Meme (MELANIA) Coin Price Prediction 2025,2026,2030

On January 19, 2025, only hours before Donald Trump's inauguration, Melania Meme Coin (\$MELANIA), the first [meme coin](#) officially supported by Melania Trump, went live. Early on, it shot skyward, but it soon turned around and dropped below its initial price.

What will happen to \$MELANIA next? I'll examine the potential of this new meme currency in my Melania Meme currency price prediction and assist investors in determining whether it's a wise investment at this time.

Melania Meme Coin Price Prediction 2025 to 2030: Summary

Let's begin our Melania Meme Coin price forecast by providing a brief summary of the token's potential futures in 2025, 2026, and 2030.

End of 2025: Melania Meme Coin is rapidly declining, but Melania's actions in the White House and token listings may act as catalysts. By the end of the year, I think the token will be worth \$4.50.

End of 2026: As new meme coins gain popularity, Melania Meme Coin may experience a decline in 2026. Additionally, the token's tokenomics—which favor the Trump team at the expense of investors—are probably going to hurt it. By the end of 2026, I think \$MELANIA will drop to \$1.70.

End of 2030: After Trump's tenure is over, Melania will no longer be the first lady and is probably going to keep quiet. Therefore, I predict that by late 2030, \$MELANIA will have reached its peak and will drop below \$0.20.

What is Melania Meme (MELANIA) Coin?

Just days before Donald Trump took office as US president, Melania Coin debuted on January 19, 2025. With so much anticipation around its debut, its price soared from \$7.40 to a new all-time high of \$13.73 in a matter of hours. In just 30 minutes, the token's market cap soared to nearly \$4 billion, proving once again how influential celebrities can be in the cryptocurrency industry. The \$MELANIA price fell below its initial price shortly after its spectacular ascent.

Melania Coin has a current market valuation of \$681 million and is selling at \$4.55 per coin. After falling from its original position of seventh largest meme coin by market valuation, it now ranks eleventh. Reasons given for the coin's demise include dwindling interest, slow adoption, and doubts about its tokenomics, which benefit the project team associated with Trump. Despite being listed on MEXC, KuCoin, and Bitget, \$MELANIA has not yet achieved listings on Binance or Coinbase, two exchanges that potentially propel its future growth.

Some also have issues with the tokenomics of the coin. A large percentage of the one billion tokens are held for the project team and treasury, leaving only 192 million in circulation. There are worries that this centralized structure could lead to team-controlled sell-offs, which would lower the token's value even further and damage investor trust. Melania Coin's ties to the Trump family, however tenuous, keep it in the sights of investors.

Melania Meme (MELANIA) Coin Price History

Melania Meme Coin debuted on the Solana blockchain on January 19, 2025—a mere twenty-four hours prior to Donald Trump's inauguration and two days subsequent to her husband's introduction of the OFFICIAL TRUMP (\$TRUMP) token.

In its first few hours of sale, the token skyrocketed from its \$7.40 launch price to a new all-time high of \$13.73. As traders shifted their focus to the introduction of \$MELANIA, the price of \$TRUMP dropped. For a short while, the token was the seventh-largest meme coin, with a market valuation of over \$2 billion.

But \$MELANIA stalled after the initial few hours and has been declining ever since. At its current price of slightly under \$6, the token has dropped to the eleventh spot among meme coins. Even though Coinbase and Binance do not yet support \$MELANIA trading, the cryptocurrency is listed on the majority of major exchanges.

Melania Meme (MELANIA) Coin Price Prediction 2025

Memes of Melania There is a great deal of unpredictability around the next eleven months when making price predictions for coin, which is less than twenty-four hours old. However, the events after the token's launch provide valuable insights.

At first, \$MELANIA's gains were driven by excitement as traders rushed to buy the token in the hopes of replicating the success of \$TRUMP's introduction a few days earlier. Melania Trump's token lost steam considerably more rapidly than Donald Trump's, which is hardly surprising given how unpopular and unimportant she is.

In a matter of hours, \$MELANIA started to decline and swiftly dropped below the token's listing price. The token's future seems bleak in light of the fact that most successful meme coins have considerably more sustained momentum. It is difficult to see how \$MELANIA would recover the value it lost since it couldn't even hold onto part of its gains the day after the token's introduction.

Though, I do anticipate a couple of developments that could serve as catalysts for Melania Meme Coin. Before anything else, Melania will formally move into the White House on January 20. When that occurs, the First Lady has the potential to become a media darling through her event planning and interior design choices, as well as through her leadership of causes unrelated to the Trump government.

Adding \$MELANIA to the exchange listings of Coinbase or Binance is another possible factor that could support the price. In an effort to win over President Trump, both exchanges will probably list the meme coin.

Despite this, the \$MELANIA token's price is anticipated to experience temporary gains due to these favorable developments, while the overall market is likely to experience losses. The token's trajectory is unlikely to be significantly altered by any of these. Consequently, they may present trading opportunities, but they will not significantly impact investors' perception of \$MELANIA.

For the year ending, I am projecting that \$MELANIA might drop to an average price of \$4.50, with a possible dip to \$3.55. At its lowest, the token has lost 52% of its value since its introduction.

Melania Meme (MELANIA) Coin Price Prediction 2026

The token's value will probably start falling sharply in 2026. In addition to the token's peculiar tokenomics, its one-year age (a lifetime in meme currency timescales) will be a major obstacle.

At the time of debut, only around 192% of the 1 billion tokens available in the \$MELANIA system were actually in circulation. With the exception of tokens held for Melania Trump and her staff, the remaining portion can be made available to the public over the following thirteen months, or by February 2026. Melania's staff will get 35% of the tokens, the Trump administration's project fund will get 20%, and an undefined "community" allocation will get 20%.

This gives Melania Trump and her associates a monopoly on the project's resources and lets her pocket tokens while other investors lose out. Melania can effectively withdraw over a third of the token supply, which would significantly reduce the value of investors' current holdings. On the other hand, right from the start, the majority of meme currencies distributed tokens to their community.

This implies that Melania Trump can sell more tokens over time. When all of the team tokens vested in early 2026, regular investors will be in a very bad and risky position. The only way out of this mess is to sell your tokens if you still have some.

This is why I think the price of the \$MELANIA token will plummet in the beginning of 2026 and then struggle to recover. I anticipate a further precipitous decline in the price of the meme coin if Melania decides to sell tokens.

In what depths may \$MELANIA sink? The average price I'm predicting is \$1.70, assuming Melania doesn't do anything to sell. But if there's an influx of team tokens, the price might drop to \$1.03.

Melania Meme (MELANIA) Coin Price Prediction 2030

I am really pessimistic about Melania Meme Coin's future in the long run. After the projected losses in 2026, it's hard to see this coin having a future. Before Trump's term ends in 2027 or 2028, Melania will almost certainly start cashing out her tokens, even if she chooses not to sell them.

Almost certainly, Melania will fade from public view once Trump resigns from office. Melania Trump hardly made an appearance during the four years while Donald Trump was not in office. She has been quite silent at campaign events and has only made public appearances to promote her book in the last year.

The \$MELANIA token is not expected to have a lot of trading activity unless there is news around Melania. Basically, the project will be completely useless by 2030 since it would have run its course. A 97% drop from where it is now, I estimate an average price of \$0.20.

What Affects \$MELANIA Meme Coin's Price?

The following important variables are likely to affect the price of Melania Meme Coin:

Trump Family Hype: The main factor influencing interest in the \$MELANIA token is probably the hype surrounding the Trump family, particularly Melania Trump. Melania's meme currency is expected to generate more attention the longer she is in the public eye. Melania's token is probably going to perform poorly if she stays in the background.

Meme Coin Market Conditions: This year, there will probably be a lot of meme coin supercycle tokens launched, including Melania. This affects \$MELANIA's price in both positive and negative ways. On the one hand, the value of the token is anticipated to increase due to a developing market for meme coins. However, alternative currencies that are more pertinent to traders and investors will compete with Melania Meme Coin.

Efforts to Market and Promote the \$MELANIA Meme Coin: The extent to which Melania Trump or Donald Trump intends to engage in marketing and promotion around the \$MELANIA meme coin remains an open question. The token was the subject of her post on X. However, investors are more susceptible to losing interest in the token if Melania fails to promote it extensively.

Selling Activity by Project Team: It is uncertain whether Melania and the Trump team intend to sell tokens as they are unlocked, all at once, or never. The price of the \$MELANIA token would experience a significant decline as a result of any selling activity of the team tokens, which would likely deter investors.

Conclusion

Memes of Melania After a promising beginning, Coin's momentum swiftly faded. Investors are at a major disadvantage due to tokenomics, and the Trump team's tight control over the token's destiny makes it appear like a hard sale.

New joke coins, such as Wall Street Pepe and Solaxy, are perhaps the best hope for crypto investors hoping to profit from Trump's presidency. To help you choose which meme coins are worth investing in, I have compiled a comprehensive guide.

Why Choose BTCC?

[Download App for Android](#)

[Download App for iOS](#)

BTCC is known as the world's longest-running exchange. Since its establishment, the platform has withstood multiple bull and downturn markets without reporting a single hacking incident, making it one of the most trusted exchanges in existence.

The firm's products are designed to meet the needs and desires of both rookie and experienced traders. Here are five reasons for using the exchange:

- **Available Cryptocurrencies on the Exchange**

As a leading cryptocurrency exchange, BTCC's platform supports over 300 cryptocurrencies, allowing investors to diversify their digital portfolios and explore numerous investment opportunities in the digital currency market. The site also provides access to newer but equally intriguing alternatives, including Litecoin (LTC) and Ripple (XRP).

The number of trading coins is projected to increase as BTCC is committed to innovation and adopting new yet promising digital currencies in order to reach a wider spectrum of traders.

- **Easy to use**

When choosing a decent cryptocurrency exchange, simplicity of use is an important thing to consider. The BTCC app has an intuitive and user-friendly layout that is appropriate for both new and experienced traders, making trading on the platform simple and efficient. It contains features like as price alerts and real-time market data, which improve the trading experience. The program also includes security features like two-factor authentication and cold storage for cash.

The site includes a competent charting system that displays information such as a cryptocurrency's 24-hour price movement, 24-hour low/high, and daily volume. These features make it simple to use and available to the great majority.

- **Reputable Customer Service**

BTCC has a good reputation in terms of customer service. The exchange offers users service via live chat and email on its website. It has official accounts on several social media platforms, including X (previously Twitter), LinkedIn, Instagram, YouTube, and Facebook. The website also has a part with blogs, news, and support centres for users who require assistance.

When users encounter problems or have complaints while using the cryptocurrency exchange, they can receive prompt customer service via email and live chat. BTCC provides 24/7 online customer care.

- **BTCC Trading Features and Tools**

BTCC offers a wide range of trading services, including spot trading, futures trading, and margin trading. It offers high leverage choices for many trading pairs, making it suited for a wide range of traders.

- **Welcome Bonus and Campaigns**

BTCC currently provides several campaigns. Investors can join in these campaigns and earn interesting prizes. For example, new users can earn rewards up to 10,055 USDT by completing relevant missions such as registration, identity verification, making first deposits, and cumulative futures trading volume. Existing users can earn up to 1,255 USDT per referral when they invite their friends to join BTCC.

BTCC FAQs

Is BTCC safe?

Based on its track record since 2011, BTCC has established itself as a secure cryptocurrency exchange. There have been no reports of fraudulent activity involving user accounts or the platform's infrastructure. By enforcing mandatory know-your-customer (KYC) and anti-money laundering (AML) procedures, the cryptocurrency trading platform gives consumers greater security. For operations like withdrawals, it also provides extra security features like two-factor authentication (2FA).

Is KYC Necessary for BTCC?

Indeed. Before using BTCC goods, users must finish the Know Your Customer (KYC) process. A facial recognition scan and legitimate identification documents must be submitted for this process. Usually, it is finished in a few minutes. This procedure has the benefit of strengthening the security of the exchange and satisfying legal requirements.

Because their accounts will have a lower daily withdrawal limit, those who do not finish their KYC are unable to make deposits. It should be noted that those who present a legitimate ID without a facial recognition scan will likewise have restricted withdrawal options.

Is There a Mobile App for BTCC?

Indeed. For users of iOS and Android, BTCC has a mobile app. The exchange's website offers the mobile app for download. Since both the web version and the mobile app have the same features and capabilities, they are comparable.

Will I Have to Pay BTCC Trading Fees?

Indeed. BTCC levies a fee for trade, just like a lot of other centralised exchanges. Each user's VIP level, which is unlocked according to their available money, determines the different costs. The BTCC website provides information on the charge rates.

Can I Access BTCC From the U.S.?

You can, indeed. According to its website, BTCC has obtained a crypto license from the US Financial Crimes Enforcement Network (FinCEN), which enables the cryptocurrency exchange to provide its services to investors who are headquartered in the US.

According to BTCC's User Agreement document, its goods are not allowed to be used in nations and organisations that have been sanctioned by the United States or other nations where it has a licence.
