NVIDIA (NVDA) Stock Price Prediction & Forecast: Is NVDA A Good Investment In 2024?

NVIDIA (NVDA), a so-called fabless chip designer, emerges as a top investment pick for U.S. semiconductor companies. With the AI boom brought by ChatGPT, NVIDIA witnessed its share price soar by more than 360% in 2023 and successfully becoming the fifth largest publicly traded company in the United States by market capitalization.

In the past year, Nvidia has witnessed a surge in its market value by an astonishing \$2.5 trillion, unseating Apple as the top-valued technology firm globally. However, this remarkable success of Nvidia has sparked discussions regarding the sustainability of its current trajectory.

Then, is it a good time to invest NVIDIA now? What is the future outlook of NVDA's stock price? The following sets forth the analysis and prediction of NVIDIA's stock price, thus helping investors determine whether it is a good investment.

BTCC supports tokenized NVIDIA stock (NVDAUSDT) trading with a leverage of up to 20x, and if you are interested in NVIDIA stock, you can register for BTCC to make a purchase.

Before we start to analyze and forecast NVIDIA's stock price, let's take a close look at what NVIDIA is.

NVIDIA Corporation (NVDA), founded in 1993, is an American semiconductor company and a leading global manufacturer of high-end graphics processing units (GPUs). Based in Santa Clara, California, NVIDIA holds approximately 80% of the global market share in GPU semiconductor chips as of 2023.

NVIDIA has advanced expertise in programmable graphics processors, achieving many important breakthroughs in parallel processing. Besides, it has a broad and leading product portfolio in AI computing.

NVIDIA's technology is used in a wide range of fields, including gaming, entertainment, virtual reality (VR), augmented reality (AR), professional visualization, artificial intelligence (AI), autonomous vehicles, and more. NVIDIA's Gpus and AI platforms are driving digital transformation across a wide range of industries, from healthcare and manufacturing to finance and transportation.

NVIDIA has been the primary beneficiary amidst the ongoing artificial intelligence revolution, with its stock soaring over 150% this year, following a remarkable 240% surge in 2023. Recently, its market capitalization surpassed the \$3 trillion mark, briefly making it the world's most valuable publicly traded company, though it now stands second to Apple.

The bulk of NVIDIA's business revolves around a select few cloud service providers and consumer internet giants, notably Microsoft, Alphabet, Meta, and Tesla. Its cutting-edge chips, including the H100 and H200, have become indispensable in the vast landscape of generative AI applications, prominently featured in OpenAI's ChatGPT, underscoring the company's pivotal role in shaping the future of AI.

NVIDIA Stock Split Plan

NVIDIA held its initial public offering (IPO) in January 1999. The stock’s IPO price was \$12 per share. Since then, NVIDIA stock has split five times. The company’s most recent stock split was a 4-for-1 split in July 2021.

Over the past decade, NVIDIA shares have experienced explosive growth, soaring from 25 cents per share to \$499 per share in August 2023.

In the May 2024 earnings conference, NVIDIA announced that it is rolling out a 10-for-1 stock split, cashing in on the AI boom it has been driving and giving investors a hefty nugget. Post split, which is effective on June 7, 2024, one NVIDIA share would be worth \$94.95.

Over the past 24 years since its inception, NVIDIA has performed quite excellent. NVDA is one of the best-performing stocks in the entire U.S. market over the past 30 years, with an overall return of about 60,000 percent.

Over the past decade, NVIDIA has seen faster development. Over the past five years, NVIDIA has returned more than 600%, compared to a total return of 55% for the S&P 500 over the same period.

Incredibly, even with a market cap of more than \$1.2 trillion, NVIDIA’s share price shows no signs of slowing down. With gains of more than 240% so far in 2023, NVIDIA is the best performing stock in the S&P 500 index.

In 2024, Nvidia emerges easily as the best-performing the Magnificent Seven member, with Meta stock a distant second at up 35.6%. Tesla stock, also a clear outlier in terms of earnings and valuation, is leading the downside with a 28.9% decline in 2024.

Is It Worth Investing in NVIDIA (NVDA) in 2024?

With global AI spending expected to increase significantly over the next few years, high-powered chips like the ones that NVIDIA produces will be in high demand. Nvidia has been the primary beneficiary of the ongoing artificial intelligence boom. Nvidia shares are up more than 150% this year after soaring almost 240% in 2023. Its market cap recently eclipsed \$3 trillion, and Nvidia was briefly the most valuable public company in the world.

Nvidia's projected sales for the current quarter were encouraging for investors. Many of them are betting that the company's newest chip, which is faster than its predecessor, will push sales higher.

But the chip's development has been challenging. During a call with analysts in August, Nvidia said it had to change the production process for the chip because it wasn't manufacturing enough that worked properly. Mr. Huang assured analysts that wouldn't cause any delays.

In addition to those challenges, Nvidia has faced government inquiries into its sales practices. The Justice Department, the European Union, Britain and China have all been looking into its business.

Overall, based on current market dynamics, if you want to bet on generative artificial intelligence (AI), there is still no better pick than NVIDIA (NASDAQ: NVDA). Based on NVDA's past performance and future expectations, the company is also well worth investing in. Anyway, NVIDIA stocks are expected to usher in a stable and promising future.
