Mega Dice (\$DICE) Staking

On July 3, Mega Dice launched new staking feature, meaning holders can now start effortlessly earning passive income, funded from a share of the platform's profits.

Token holders who stake their \$DICE are allowed to earn daily rewards tied to Mega Dice Casino's performance. This innovative approach not only fosters a strong relationship between the casino and its community but also incentivizes long-term participation within the ecosystem.

A screenshot of the Mega Dice website's staking interface. The page has a dark theme with green accents. At the top left is the Mega Dice logo, and at the top right is a "Back to home" button. The main heading is "Staking tokens". Below it is a descriptive paragraph: "Discover Mega Dice's staking section, where token holders unlock rewards and benefits by participating in the ecosystem. Stake with ease for passive income and network growth." To the right of this text is a "Connect wallet" button. The interface is divided into two main columns. The left column is titled "Your stakeable" and shows a tilde symbol (~) and an "Amount to stake" input field with the number "1". Below this is a "Stake your Dice" button. The right column is titled "Staked" and shows "0". Below it is "Unclaimed rewards" showing "0" and a note: "Claiming will be enabled once the presale has finished." Below this is a "Claim" button. At the bottom of the page, there are four summary boxes: "Sold tokens 24,971,820", "Staked tokens 7,254,203", "APY 289.5%", and "% Staked 29%".

On top of that, Mega Dice has allocated a whopping 42 million tokens specifically for staking, with a two-year distribution plan that doles out rewards every hour.

This schedule allows users to compound their earnings with every passing hour, supercharging their returns.

Reward distribution starts 24 hours after staking begins, so everyone has a fair shot at reaping the rewards together.

With DICE's DEX debut expected in the next few days, investors can still benefit from its current 100% APY rewards by joining its ongoing ICO.

The staked tokens can be claimed once the presale ends or after the lock-up period expires.

What Factors impact the Price of Mega Dice (\$DICE)?

There are many factors that can exert huge influence on the Mega Dice token (\$DICE) price, including:

- **Token demand:** Projects that offer passive rewards typically perform better than many other tokens as investors know that no matter what happens, they are likely to get a reward in one way or another.
- **Overall crypto space:** Bitcoin and the top altcoins like Ethereum and Solana are pushing the whole crypto space. If these coins perform well and make new highs, many other tokens will benefit as well.
- **Project development:** Mega Dice is already a well-established casino. Adding its token into the mix has the potential to make the casino even more successful. And that will affect the token price.
- **Exchange listing:** Exchange listing is typically a positive event for the token price as it opens the token to new users and liquidity pools. Being listed on a centralized exchange has even more weight.
