About SwissBorg (CHSB)

SwissBorg is democratising wealth management by making it fun, fair, and community-centric. Headquartered in Lausanne, Switzerland, SwissBorg holds a Virtual Currency License, which allows them to provide virtual currency exchange and virtual currency wallets internationally.

The company's showcase product, the SwissBorg app, is empowering over 450,000 users to buy, sell and exchange digital assets, with features like AI-powered asset analysis and Portfolio Analytics to help them make smart investment decisions. Their best-in-class Smart Yield wallet gives users the opportunity to earn yields of up to 20% of USDC, along with increasing the benefits of our own token's staking utility by offering Premium account holders up to 2X yield.

The SwissBorg token is the heart of the SwissBorg ecosystem, and was one of 2020's top-performing tokens, skyrocketing by 2,700% and reaching the top 70 tokens on CoinMarketCap.

Their gamified Bitcoin prediction app, Crypto Challenge (formerly the Community App), now has over 300,000 players, helping the cryptosphere reach its goal of mass adoption by providing our players with a free and zero-risk way to learn about the [crypto](#) market.

SwissBorg believes that blockchain technology can empower everyone to control their wealth, and that this is the next step towards a world of decentralised nations, where every individual is welcome and is fairly rewarded for their contributions.

What Makes CHSB Different?

According to SwissBorg founders, the current banking system is obsolete, and their project is a response to this problem. By introducing blockchain technology to personal finance, SwissBorg aims to give individuals complete control over their portfolios and investments.

The central values of the company include transparency, equality through meritocracy, and impartiality. The SwissBorg platform depends heavily on blockchain decentralization to ensure that personal data is protected and users can control their funds without restrictions.

The SwissBorg team boasts inclusivity and has members all over the world. The mobile app is one of the top cryptocurrency apps in app stores and has attracted more than 450,000 verified active users globally.

How Is the SwissBorg Network Secured?

SwissBorg and the CHSB tokens are Ethereum-based. As an ERC-20 token, CHSB will be secured by the proof-of-stake ([PoS](#)) consensus, as Ethereum itself transitions to it.

Unlike the proof-of-work ([PoW](#)) consensus employed by Bitcoin, PoS relies on majority holders to mine new tokens. This consensus method is significantly more versatile compared to PoW, as it introduces the process of staking to the blockchain layer.

In addition, PoS is becoming more popular among developers and users alike because it is more energy conscious. While PoW requires a lot of computing power for mining, PoS relies on static coin holdings and gives more mining power to users with a more significant stake.
